

## Specifications for HDIS

*The configurations below (or better) are recommended for optimal performance with HDIS.*

### Server:

- 24 GB+ RAM
- 4 Core CPU or better
- Windows Server 2016 or better
- 64bit OS
- 500GB (minimum) hard drive space, free

### Workstation:

- Windows 7 or greater
- 4GB (minimum) RAM
- 64GB (minimum) Hard drive free space, Recommended 100GB

### ***Please note:***

**Hosted Servers or Accessing your Work Network from Home:** If you are using a hosted server over the internet, each user must use Remote Desktop to access the HDIS Software. Each user must have their own Remote Desktop account. Google Drive and Microsoft OneDrive are **not** suitable alternatives to a hosted server
